

VARIABLE ROLLER SORTING MACHINE

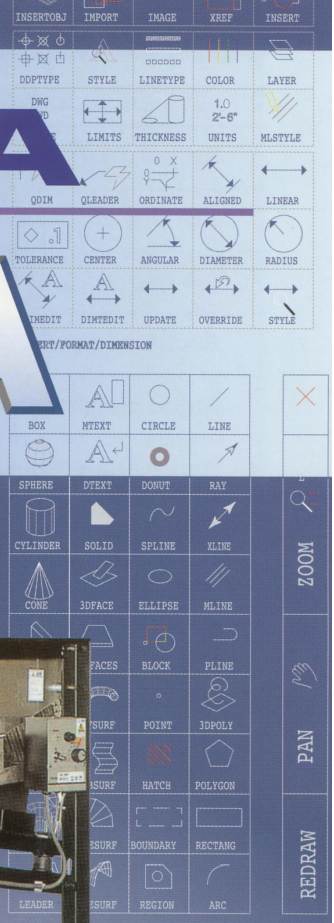

YUTAKA YS-1A

Top X-Z

Side Y-Z

Sorts a lot more than just threaded fasteners and balls. The variable roller design can sort all types of metal products, pharmaceuticals, electronic parts, plastic parts, food, and many other items. The steel frame rests on adjustable feet and heavy duty casters for easy transport to wherever it's needed.

Specifications

Screw size	M2-M10x5~45mm length under head
Sorting accuracy	±0.05mm on head diameter
Feeder	Vibratory bowl feeder
Sorting Speed	700~3,000 pieces per minute
Roller diameter and length	80mmx800mm
Roller adjustable range	20mm Max.
Motor	25Wx2 Variable speed
Weight	300Kgs

YS- 1A (Variable Roller Sorting Machine)

Features

- 1 Dial gauge makes it easy to execute fine roller adjustments.
- 2 A separate variable speed motor powers each roller. Workpieces are constantly rotated so the complete circumference is inspected. The YS-1A accommodates a significantly wider variety of workpiece types compared to other roller sorting machines.
- 3 Precision rollers feature a super-hard 0.1mm chrome plated surface that provides a higher level of precision and an extremely long service life.
